

ResponseCard **RF LCD**

The RF (Radio Frequency) LCD handset is new but we think it's quickly going to take over from the RF handset as our most popular.

Why? It's just as scaleable but a small LCD display tells you all the stuff you've been asking us for since the dawn of time (well, since the RF handset first appeared anyway). See clearly the vote you just submitted, your channel number and battery life.

Specifications

Enclosure

- ▶ Dimensions: L 8.4cm x W 5.3cm x D 0.76cm.
- ▶ Weight: 28g with batteries.
- ▶ Approximately size of a credit card.
- ▶ Durable, rugged case for maximum longevity.

User Input

- ▶ 12 Keys (1/A - 10/J, Ch/Channel, ?)
- ▶ Answer Key - answers automatically transmitted.
- ▶ Programmable - manually enter new ID number.
- ▶ ResponseCard Programmer compatible.

Display

Participants receive visual confirmation of transmissions on LCD screen, in addition to LED indicator. Successful transmissions are acknowledged via LED with a three second green light signal. Channel setting and battery life are always present on screen.

Power & Power Management

- ▶ Two coin cell CR2032 (3.0V) lithium batteries.
- ▶ Deep sleep mode when not in use.
- ▶ Average battery life is 12 months.

User Identification

- ▶ Select a channel in less than five seconds, indicating session choice.
- ▶ Select a channel anytime - even when a session is underway.
- ▶ Channel selection is stored in nonvolatile memory.
- ▶ Channel selection is preserved until changed by participant.

RF Technology

- ▶ 82 channels can be running at once in close proximity.
- ▶ Fully FCC, CE and Industry Canada certified.
- ▶ Will not interfere with other technologies.

Range

- ▶ 60m range (120m coverage) with either an RF Receiver or a ResponseCard AnyWhere receiver.
- ▶ 120m range (240m coverage) with a Long-Range Receiver.

Receiver Compatibility

ResponseCard RF LCD keypads are compatible with the following ResponseCard receivers:

- ▶ Standard RF Receiver
- ▶ Long-range RF Receiver
- ▶ ResponseCard Anywhere
