

ResponseWare

ResponseWare is our revolutionary system for laptops, desktops, mobile phones, PDAs, and pretty much anything that can connect to the internet.*

Turn your computer or mobile device into a virtual ResponseCard giving you the ability to do all the amazing, yet usual stuff with TurningPoint, as well as submit questions back to the presenter and send numerical or essay type answers.

User Options

Browser-Based

ResponseWare requires no special software to install or configure and no need to alter firewall or port settings. The system supports nearly all JavaScript™-enabled web browsers across multiple platforms and operating systems. Turning Technologies provides all of the hosting and web services necessary for a ResponseWare web-enabled interactive polling session, which eliminates the need for any organisation to host, maintain, and support the application and allows for immediate utilisation of the response technology.

Device Specific Applications:

Participants can download ResponseWare for iPhone, iPod touch® or BlackBerry® smartphone to take advantage of the specific features and functionality available with the device. Respond with:

- ▶ Apple iPhone
- ▶ BlackBerry smartphones
- ▶ Microsoft® Windows Mobile® devices
- ▶ Laptops or desktops and more...

Response Options

- ▶ Multiple-choice
- ▶ Alphanumeric
- ▶ Multiple Response
- ▶ Essay

Licensing Models

We have a variety of ResponseWare licensing models to best meet your requirements. Our standard model is based on an annual licence and scales up with the number of voters you wish to work with at any one time. In addition, ResponseWare can be used seamlessly in mixed environments alongside traditional ResponseCards for even more flexibility.

System Requirements

ResponseWare

- ▶ Internet connectivity
- ▶ Must support AJAX, JavaScript™ and HTTP requests

ResponseWare for iPhone™

- ▶ iPhone or iPod Touch OS 2.0 or higher
- ▶ Wi-fi or cellular connection

ResponseWare for BlackBerry® smartphones

- ▶ BlackBerry OS version 4.2.0 or higher
- ▶ Wi-Fi or cellular connection (for optimum performance, a wi-fi connection is recommended)

****At this moment ResponseWare Web hasn't been tested on all web devices. Get in touch to find out more and apply for a free trial to see for yourself whether it will work for you.***
